Custom Tools	Guide Management	Guardian Access
<p> <b>Guide Designer</b> Create and edit guides with images, videos, audio files, colors, etc.</p> <p> <b>Schedule</b> Account-wide scheduling of guides stored in any accessible library</p> <p> <b>Notifications</b> Receive alerts on all devices linked to user account's schedule</p> <p> <b>Upgrades</b> Auto upgrades for new custom tools as they are released</p>	<p> <b>Personal Library</b> Organize personal guides, grant access to them, includes perpetual play</p> <p> <b>MPower Me Library</b> Access to play, copy, and edit guides contributed by the MPower Me team</p> <p> <b>Play Tab</b> One-tap access to scheduled and favorite guides</p> <p> <b>Community Libraries</b> Access to libraries open to MyGuide Care users (e.g., providers, stores)</p>	<p> <b>Passthrough Permission</b> Log-in remotely on the user's behalf for full access to tools &amp; settings</p> <p> <b>Live Monitoring</b> Remotely view MyGuide activity and guide responses in real time</p> <p> <b>Custom Alerts</b> Select specific conditions of use to receive a text and/or email alert</p> <p> <b>Report Exports</b> Download a variety of data reports about the user's account</p>

## Accommodations

MyGuide Care combines standard mobile device settings and customized software to provide accommodations for cognitive, sensorimotor, vision, and hearing deficits.

Cognitive	Sensory
<p><b>Access:</b> Customize content elements to build guides from simple to complex commensurate with the user's cognitive functioning level.</p>	<p><b>Haptic Feedback:</b> (Vibration): Choose vibrations and/or sounds when the screen is touched, including tapping and swiping.</p>
<p><b>Choice Options:</b> Personalized open-ended or custom response options with or without image, text, or audio, allow one or multiple selections.</p>	<p><b>Auditory Feedback:</b> Sounds, audio files, and music can play on specific pages, when a response option is selected, throughout guide play, &amp; alerts.</p>
<p><b>Conditional Interaction:</b> Based on user's selection, auto-advance to another page, reveal or remove other content, and/or trigger a custom alert.</p>	<p><b>Text-to-Speech:</b> Text on the screen is read aloud automatically and/or when it is selected.</p>
<p><b>Focus Mode &amp; Favorites:</b> Display all guides on a specific shelf or scheduled &amp; favorite guides on the Play tab when the app is opened.</p>	<p><b>Voice of MyGuide:</b> Change the pitch, speed, and accent of dozens of generated voices.</p>
<p><b>Lock Options:</b> Prevent accidental modification of account settings, schedule, access, and content.</p>	<p><b>Voice-to-Text:</b> Dictate the text MyGuide should type into your device when building and playing guides.</p>
<p><b>Play on Tap:</b> Quick and easy access to play a guide with one tap supports vision impairment, poor dexterity, or low cognitive function.</p>	<p><b>Voice Controlled MyGuide:</b> Hands-free control of navigation and selections by speaking the text on the screen or number that appears next to it.</p>
<p><b>Scheduling:</b> Account-wide scheduling for all device notifications and one-tap access, also coordinated with calendar.</p>	<p><b>Color &amp; Contrast:</b> Change color, size, and font of text, and color and opacity of backgrounds and text boxes for custom visual layering of images and text.</p>
<p><b>Timers:</b> Pre-program timer attributes – how and where they appear visually, allow or deny skip to the next page before it expires, and touchless auto-advance.</p>	<p><b>Enlargement Controls:</b> Adjust the size of text, images, response options, buttons, text boxes, and zoom in or out on any element.</p>
<p><b>Videos &amp; Hyperlinks:</b> Add videos with player controls or a hyperlink to any website for maximum multimedia options, including modeling and one-tap video chat.</p>	<p><b>Shimmer &amp; Highlight:</b> Text boxes are highlighted or contrasted for left to right "shimmer" effect, with or without text-to-speech aloud reading.</p>
